Jun 2017 – Aug 2017 | Lodhi Road, DL

- Learnt the basics of HTML, CSS, JS and Java Servlets.
- Implemented the learnt by making an online noticeboard system for notice management by the company.

PROJECTS

ORDERMATE | GITHUB

Redefining the way we deal with the orders in food courts. Based on the Django backend, it uses REST API to sync data between the vendor's web portal and the customer's mobile application. Here, customers can book orders, receive orders, make online payments and much more without going to the food stall.

NOZHEIMERS | GITHUB

An AI based application which can help the Alzheimer's patients to remember things. Based on Microsoft's Face Recognition API, this app notifies about each and every person the patient has ever met and provides their personal details like date and time of last meet, relation with the patient, name.

ACHIEVEMENTS

2018	Web Department Head	TEDxDabri
2017	1 st Runner-Up	HackData Hackathon
2017	5 th /120 teams	HackDTU Hackathon
2014	2310/2400 Score	SAT Subject Test
2012	4 th /120	SLC Examination
